Printing Guide

How to set up A4 Printing

Firstly, you need to set the global parameter to indicate that your location will be using A4 Printers. Then you will need to set all INRstar workstation local settings, for each user at each workstation,

to point to the A4 printer attached to that workstation.

Set the global parameter

Log on to any INRstar workstation as a user with Location Administrator

permissions. Navigate to Options / Location Management / Printing.

Please Note: Displaying Tablet Graphics on a dosing diary is only designed for use with colour printers.

Set the local workstation profiles

On the window in which INRstar is running, choose Settings, Printer, Default Printer and then select the appropriate printer for the workstation.

INR	star				
File	Settings	Help			
	Print	ter 🕨	Default Printer	•	\\PRINTSVR\MAIN Printer
	CoaguChek Interfaces		Label Printer	• •	\\PRINTSVR\Office 1 Printer
					\\PRINTSVR\Zebra Label Printer

The Default printer will be used to print the practice activity, overdue and exceeded reports, overdue letters, Patient Dosing Diary and the Patient Summary document.

How to set up Label Printing

Firstly, you need to set the global parameter to indicate that your location will be using Label Printers. Then you will need to set all INRstar workstation local settings, for each user at each workstation, to point to the Label printer attached to that workstation. Finally you will need to set the physical printer properties to match the documents produced.

Set the global parameter

Log on to any INRstar workstation as a user with Location Administrator

permissions. Navigate to Options / Location Management / Printing.

Diary Print	Format: L	abel	_							
										Edit
/ersion : 1.4.0									c c (

Click the Edit button and choose 'Label' from the selection list.

Manage Location(s) Details Users Components Printing Diary Print Format: Label Select Setting A4 Label Version : 2.0.0 | Active Patients : 37 / 300

The 'Diary Tablet Graphics' selection will be set to 'Tablet Graphics Hidden', because the label dosing diary cannot display tablet graphics.

Click the Save button.

Set the local workstation profiles

You will now need to set each individual INRstar workstation user's profile to point to the label printer attached to that workstation.

On the window in which INRstar is running, choose Settings, Printer, Label Printer and then select the appropriate printer for the workstation.

File	Settings Help			
T IIIC	Printer +	Default Printer 🕨		\\PRINTSVR\MAIN Printer
	CoaguChek	Label Printer 🔸		\\PRINTSVR\Office 1 Printer
	Interfaces		~	\\PRINTSVR\Zebra Label Printer

The Default printer will be used to print the practice activity, overdue and exceeded reports, overdue letters, Patient Dosing Diary and the Patient Summary document. The Label printer will only be used to print the Patient Diary and only if the global parameter has been set to 'Label'.

Setting the printer properties

This is for a Zebra LP2844 printer.
